WAREHOUSE DESIGN AND OPERATION FOR PRODUCTIVITY

Give Us One Day and We'll Help Transform Your Warehouse from Cinderella to Star of the Show.

We have created an information-packed, down-to-earth one-day seminar that draws on our 20+ years of experience in designing and operating warehousing facilities. You will walk away with ideas you can begin implementing immediately.

Let's face it. Most companies put "warehouse design and operation" on the back burner. They hide their warehouses. They often think "warehouse" means "endless drain on profits."

You never hear those sentiments at Alba Logistics, the warehouse specialists. Show us a warehouse and we will show you how to take it to the centre of the profit stage. You will be amazed at how much money you might be leaving on the floor — and how you can capture savings most companies don't even consider.

We have helped dozens of clients save considerable amounts of money on supply chain management costs - without adding a single metre of space or a new building. And we have helped dozens of clients save by building their warehouses right the first time.

This seminar is the distillation of that knowledge made accessible to you in one single day.

WHAT ARE THE BENEFITS OF ATTENDING THIS SEMINAR?

One tip from this seminar could save you ten, twenty or even a hundred times your investment.

- you take away practical, actionable ideas that begin saving you money and time - right away
- you accelerate your learning of the fundamentals of effective design and operation
- you get fast answers to your most challenging questions
- you get to understand the pros and cons of the myriad storage and materials handling equipment options
- you learn how to specify and select warehouse equipment and software that is appropriate for your business
- you get to meet like-minded people facing similar challenges to your own
- All the above give you a competitive advantage in your industry

Taylor's Lane, Dublin 8, Ireland

WHY ATTEND THIS SEMINAR?

We will present money-saving ideas that can be applied to any business that operates a warehouse.

You will discover:

- How to analyze where you stand against industry standards (so you can direct your efforts to challenges with the greatest impact on the bottom line)
- Guidelines for deciding what you need to change (so you save money by fixing only what you need)
- How to save money on new facilities by working from the inside out: our logistics-before-architect approach
- Our checklist to evaluate the latest state-of-the-art storage and materials handling equipment (so you know what's right for you, your products types and sizes - before you make a costly investment)
- How payback and ROI calculations work for a warehouse (so you can decide if a large investment will ultimately be more profitable — and when to opt for the smallest solution)
- How to avoid the 5 most common mistakes in implementing a warehouse management system
- The 7 most critical time-and-money-saving steps for going live with a new operation
- How to slash labour costs in order-picking
- How to use technology to achieve cost savings and reduce labour input (without spending your money on what you don't need)

WHO SHOULD ATTEND THIS SEMINAR?

Your business will gain the most benefit if you are a Manager or Supervisor in business functions related to Supply Chain, Logistics or Warehousing. You will find the seminar of particular value if you:

- Are newly appointed to your role and need to get up to speed quickly with the latest techniques and developments
- You are planning to build a new warehouse or distribution facility
- You are upgrading or reconfiguring an existing facility
- You are looking to improve performance and productivity through the introduction of measurement systems and benchmarking
- You are upgrading storage equipment, materials handling equipment or warehouse management software
- You are interested in understanding the complex role of the warehouse in the supply chain system

Participants tell us the networking during lunch, breaks and group exercises added an extremely valuable bonus to the day.

The seminar runs a full day with a short break for lunch and you will leave with dozens of pages of notes. Because of the intensity of the seminar, we ask you to leave behind your mobile phone and plan to arrive on time for each section.
